Description

Kompanija Stanišić Bio pod robnom markom Šumska Tajna proizvodi namaze od šumskih pečuraka koji spadaju u visoko kvalitetnu premium hranu. Na ideju da napravimo ovaj proizvod došli jer smo prepoznali da su ljudi sve svesniji neophodnosti uvođenja zdravih proizvoda u svakodnevnu ishranu. Odlučili smo se da nam osnova budu šumske pečurke jer pečurke spadaju u najzdravije plodove prirode, a mnogi smatraju da se u njima krije spas za mnoge bolesti današnjice.

Sirovinu nabavljamo od sertifikovanih kompanija čije se otkupne stanice nalaze po planinskim predelima Srbije. Proizvod je namenjen svima onima koji žele zdravo da se hrane. Šumske pečurke se ne mogu uzgajati u vestačkim uslovima i uspevaju samo u prirodi u organskom okruženju.

The company *Stanisic Bio* produces spreads made of forest mushrooms under the brand name of *Forest Secret* classified as high-quality premium food. We came across the idea to start producing this product once we recognized that people are increasingly aware of how important it is to introduce healthy foodstuff in their everyday diets. We decided to take forest mushroom as our base since mushrooms are considered to be the healthiest fruits of nature and a secret to eliminating numerous diseases of the modern times.

We supply our ingredients from certified companies whose purchase stations are located in the mountain regions of Serbia. The product is intended for all those who want to have a healthy diet. Forest mushrooms cannot be grown in artificial conditions and can grow only in natural and organic environment.
